

Environmental Policy

Environmental Policy

Copper & Optic Terminations Ltd controls the environmental impacts of the manufacture of Industrial and Aerospace products at its site at Unit 1, Stone Road Business Park, 55 Stone Road, Stoke on Trent, ST4 6SR and all associated activities and services using a documented environmental management system. All Raw materials purchased parts and consumables meet environmental regulatory requirements, U.K. legislation and any other obligations.

Copper & Optic Terminations Ltd is committed to the protection of the immediate environment as a high priority and will endeavor to integrate environmental management into all aspects of its business operations and to comply fully with all applicable regulations and any other obligations that relates to our impact on the environment including pollution prevention.

Wherever possible / practicable the company will minimize disturbance to the local and global environment and to the local community. To achieve this goal each manager has a responsibility for environmental protection, including the achievement of acceptable standards wherever possible from suppliers and contractors. Each manager has a commitment to flow down these goals to his / her team and to continuously strive for improvement within the areas of their control.

It is the responsibility of all employees of the company to comply with legislation, company procedures and processes and any other obligations to ensure a minimum impact to the environment during the manufacturing process.

Copper & Optic Terminations Ltd will liaise with statutory bodies and endeavor to meet all regulatory and best practice requirements. Objectives and targets will be set within the company Quality Management System to continually improve our environmental performance. Consumption and use of utilities (gas, electric, and water) wherever possible, will also be reviewed and monitored as part of the environmental management system and regular audits will take place to check the effectiveness of our controls. The environmental management system is based on the ISO 14001 Standard.

We are committed to improve manufacturing processes, minimize waste and to conserve energy wherever possible and to re-use and recycle materials where practicable. If requested we will always provide information to any interested parties and wherever possible assess in advance any environment impact on any new business potential or manufacturing process.
