

Copper & Optic Ltd REACH compliance statement

To whom it may concern.

European Union regulation (EC) 1907/2006 requires **Registration, Evaluation and Authorization of Chemicals (REACH)** manufactured and imported into the European Union. UK REACH Regulation was brought into UK law on 01/01/21 as a domestic replication of the EU regulation.

Copper & Optic Terminations Ltd. wishes to ensure its business partners that it is fully aware of all REACH regulations and is committed to the ongoing compliance with all legal obligations as well as the appropriate management of risks posed by chemicals throughout the supply chain.

According to Article 3 (3), Copper & Optic Terminations Ltd. are classed as an article producer.

Copper & Optic confirm that:

- We are aware of REACH Regulations, including the use of restricted materials included in Annex's XIV and XVII.
- We do not manufacture or import any substances that meet the criteria of Article 7 (1) and therefore do not require registration.
- We recognise the obligations within Article 33 to inform of the use of Substances of Very High Concern (SVHC) >0.1% of article weight.
- We require our suppliers to guarantee their commitment to REACH and request their ongoing compliance.
- We hereby certify that the products supplied by Copper & Optic Terminations Ltd. are fully compliant with the REACH regulations and do not contain any (SVHC) above the specified threshold.

We declare that to the best of our knowledge the information provided here is true and complete. We endeavour to timely and accurately inform all our customers of any relevant developments should something change within our product portfolio or in the related REACH legislation.

The above statement has been made following a review of the latest candidate list at time of signature). The live candidate list can be found on the European Chemicals Agency Website.
