

Environmental Policy

Copper and Optic is committed to minimizing the environmental impact of its services and operations. We recognize that our activities have the potential to affect the environment, and therefore, are dedicated to continuous improvement in our environmental performance.

We strive to protect the environment through the prevention of pollution and minimising the environmental impacts of our processes – such as waste generation and consumption of resources. Where possible, we will work closely with our suppliers and partners to encourage environmentally responsible practices throughout our supply chain.

Copper and Optic ensure compliance with all relevant environmental legislation, regulations, and other requirements applicable to our operations. We will monitor changes in these standards and adapt our practices accordingly.

We will regularly review our environmental management system, constantly striving to minimise our environmental impact where possible. Where new requirements or obligations are identified, they shall be enacted upon at the appropriate level to ensure the integrity of environmental management within our organisation.

Copper and Optic is dedicated to achieving these commitments by fostering a culture of environmental responsibility, where everyone shares accountability for the protection of the environment.

This policy will be regularly reviewed and updated to ensure its relevance and effectiveness in meeting our environmental goals.
